SECTION 6 TABLES AND CHARTS**6.1 Determination of Airline Miles**

6.1.1 The distance between the originating rate center and the terminating rate center calculated by using the "V" and "H" coordinates of AT&T FCC Tariff No. 274 in the following manner:

- a. Obtain the "V" and "H" coordinates for the originating rate center and the terminating rate center.
- b. Obtain the difference between the "V" coordinates of each of the areas. Obtain the difference between the "H" coordinates.
- c. Square the difference obtained in Step b.
- d. Add the squares of the "V" difference and "H" difference obtained in Step c.
- e. Divide the sum of the squares obtained in Step d. by ten (10). Round to the next higher whole number if any fraction is obtained.
- f. Obtain the square root of the whole number obtained in Step e. Round to the next higher whole number if any fraction is obtained. This is the distance between the areas.

6.1.2 For example, the distance between Miami, Florida and New York, New York, is calculated as follows:

	<u>V</u>	<u>H</u>
Miami	8,351	527
New York	<u>4,997</u>	<u>1,406</u>
Take Difference	3,354	-879
Square and add:	$11,249,316 + 772,641 = 12,021,957$	
Divide by 10 and round:	$12,021,957 \div 10 = 1,202,195.7 = 1,202,196$	
Take square root and round:	$(1,202,196)^{1/2} = 1,096.4 = 1,097 \text{ miles}$

SECTION 6 TABLES AND CHARTS (Continued)**6.1.3 Rates and Mileage Tables****6.1.4 Table I****METHOD FOR CALCULATION FOR AIRLINE MILEAGE****Method of Calculation**

The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) coordinates, listed in Table II, on Section 6, according to the following formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

where V_1 and H_1 correspond to the V & H coordinates of City 1 and V_2 and H_2 correspond to the V & H coordinates of City 2.

Example:	<u>V</u>	<u>H</u>
City 1 - Cleveland	5574	2544
City 2 - Akron	5637	2472

$$\sqrt{\frac{(5574 - 5637)^2 + (2544 - 2472)^2}{10}}$$

$$\sqrt{9028} = 30.04 \text{ miles} *$$

Airline Mileage = 31 miles

* Result will always be rounded to the next highest mile.

6.2 Table II LightXpress Usage Charges Calculation

a. General Description

1. Divide total aggregate usage by the number of LightXpress lines in service.
2. Within each band, calculate the total charges by summing the products of the hourly rates and the actual usage within the hourly step.
3. Divide the results of calculation 2 by the results of calculation 1 for each rate band.
4. Multiply the actual usage within each rate band by the results of calculation 3 for each rate band.
5. Sum the results of calculation 4 to arrive at the total usage cost of LightXpress.
6. The example shown below is based upon usage applied to the DAY RATES (8:00 a.m. to 5:00 p.m.). Under actual conditions, usage per line will be an accumulation based upon the time of day usage actually occurred, i.e., 150 hours:

100 Hrs. x DAY RATES (8:00 a.m. to 5:00 p.m.)
30 Hrs. x EVENING RATES (5:01 p.m. to 10:59 p.m.)
20 Hrs. x NIGHT RATES (11:00 p.m. to 7:59 p.m.)
150 Hours TOTAL/MONTH

Example

1. Total hours carried: 270 hours
Number of lines: 3 lines

On-Net Hours = $150 \times 60 = 9000$ min. of use

2. Price out a line for On-Net.

$9000 \text{ min.} \times .14 = \1260.00

8.1 Operator Service Charges

This section sets forth the rates and charges applicable to the Carrier's Operator Assisted Service offerings. The total charge for each completed operator assisted call consists of two charge elements: a one-time fixed operator service charge added to the first minute of each operator service call, which will be dependent on the type of billing selected (i.e. Calling Card, Third Party) and/or the completion restriction selected (i.e. Person-to-Person); and a measured usage charge dependent on the duration, distance, and time of day of the call. LCI TeleConferencing

Arena Conference Service: This basic service is an automatic conference call for groups familiar with audio conferencing and do not require the assistance of a LCI Telemanagement Conference Support Specialist.

Personal Conference Service: Personal Service is an operated assisted service where an operator is assigned to a client's call and meets special protocols requested by the client. These protocols may include but are not limited to checking each line for audio quality before admitting it into the conference, performing a roll call of all attendees prior to the start of the conference, admitting late attendees into the call, screening each participant for a password for security purposes, and a variety of operator assisted services.

Personal Plus Conference Service: Like the Personal Service, one or more operators are selected for the client's call and remain with the call throughout its duration. With Personal Plus, operators actually remain on-line to provide special assistance throughout the conference. This may include breaking the conference into subgroups, admitting and removing participants for special agenda items throughout the call, changing participants status from listen only to interactive, or just monitoring the quality of each site during a very high level conference.

Proline Conference Service: Proline Services are customized and provided for individual clients on request. These may include but are not limited to analyst meetings, investor relations, pre conference, crisis management, and conferences for special events. LCI Telemanagement/ATS services during these conferences may include announcing, technical support, selection of speaker phone and microphone equipment, and a variety of customized services.
